

We are recruiting ...

Business Process Improvement Manager

The UKROEd Data Security & Information Management Business area is responsible for ensuring the secure and efficient use of data internally and throughout the scheme. We are looking to recruit a Business Process Improvement Manager to establish continuous process improvement throughout the organisation.

With experience in mapping business processes, identifying areas of improvement, and developing use cases (for agile development projects), the persuasive individual will lead on introducing change and efficiencies for the DORS+ system and throughout UKROEd, ensuring that systems and processes are effective, efficient, accessible, and secure for internal & external stakeholders and particularly the general public.

With a “can do” attitude, this new role will be pivotal in the development of a growing business area, at an exciting time, driving improvements in an ambitious 3-year strategy to establish IT, data protection, and data security as the foundations for future success.

Home-based, with regular UK travel to stakeholder locations (when safe to do so), UKROEd offer a salary range of £50-55,000*, 28-days holiday, and the opportunity to play a critical role in the development of UKROEd and how we support the scheme. * Subject to Job Evaluation

To discuss the role in more detail, please contact stephen.cole@ukroed.org.uk
